

Psychologist Uses MBTI® Certification to Better Understand Self, Explore New Practice Areas

“This deeper level of understanding is something incredible I can offer to my clients to help them understand their preferences and how their interactions take place.”

Why did you want to get certified to use the MBTI assessment?

I want to move my career in more of a leadership consulting and organizational consulting direction. I've been a psychologist for the past decade, and while I've really enjoyed it, I've wanted to do more positive psychology. To me, working with leaders and focusing on strengths comes from a more positive place in psychology.

What was the most interesting thing you learned during the four-day certification program?

I took the MBTI assessment in graduate school 10 years ago and got a very superficial understanding of it. Going through four full days with Michael Segovia as our leader was really fabulous. I felt like for the first time I really understood what it meant to have the preferences that I came out with. I'm walking away with a much better understanding of myself and how I interact with others, and what triggers me and why it triggers me, and that's all very valuable. On top of that, this deeper level of understanding is something incredible I can offer to my clients to help them understand their preferences, and how their interactions take place and what could trigger them.

Would you recommend the MBTI® Certification Program to a colleague?

Definitely. It's valuable on so many different levels, from personal to professional.
